

## Driving-related skills assessment

Beaufort Memorial Hospital's Outpatient Rehabilitation clinic offers a driving-related skills assessment for those who have had an injury, illness or personal change that may have caused impairments related to driving or whose family members are concerned about their safety when driving.

There is a cash discount and an additional discount if you pay on the day of the assessment.

### The assessment:

- Is a one-to-one clinical evaluation administered by a licensed occupational therapist (requires a physician referral)
- Takes approximately 1 ½ to 2 hours to administer
- Includes range of motion and strength testing, evaluation of fine and gross motor coordination skills, brake reaction time and in-depth visual, cognitive and perceptual skills testing
- Is not a behind-the-wheel test and is not covered by most insurance companies
